

Universal Handle Kits

Upgrade your OEM linkage with the new Flushmate Universal Handle Kit, which fits left and right-hand applications for the Flushmate 503, 503H & 504 Series Flushmate Systems.

A better flushing experience

Our handle and linkage assembly eliminates loose handles, ensures a full handle return after every flush, and is ADA compliant.

One size fits all

The Universal Handle Kit is compatible with all right- or left-handed two-piece pressure-assisted toilets with Flushmate 503, 503H (produced after February 29, 2008), or 504 Series systems.

Quiet operation

A sealed cable eliminates the binding of the rod for a smoother, quieter flush.

Various handle finishes to fit your style.

The Universal Handle Kit comes with everything needed for your Flushmate-equipped toilets and is available in various finishes to match your project.
